## Alteryx: Data Profiling

The screenshot shows the Alteryx Designer interface with a workflow titled "DP\_SF\_Film\_Location.ymd". The workflow starts with a "Google BigQuery Input" tool, which is connected to a "Basic Data Profile" tool. This profile tool is then connected to three separate "Field Summary" tools, each represented by a green binocular icon. The results of these summaries are displayed in a "Results - Browse (7) - Input" window, which shows two fields: "Record" and "Desc". The "Record" field contains two entries, and the "Desc" field contains two entries, both labeled "Table - View Browse Tool Report Tab".
